Specular reflection 394
Streptococcus mutans 112, 180, 458
– *sanguis* 71
Sucralose 138, 439
Sucrose 180, 367
– intake 65
Sulfated polysaccharide 119
Surfaces 354
Sustained release 445
Sweeteners 439

Tea 439
– caffeinated, decaffeinated, herbal 88

Teeth 204
Tooth staining 445
Toothbrushing 194
Toothpaste 418

Unerrupted teeth 83

Validity 326
Varnish(es) 40, 45
Viable counts 65
Virulence factors 65
Viscosity 361
Vomiting 361

Water rinsing 194
– supply 83
Whites 169

Xylitol 34, 180, 408

Zinc 71, 458

ORCA Announcement

ORCA Rolex Prize 1996

The 1996 ORCA Rolex Prize has been awarded to Professor Andrew Rugg-Gunn from the University of Newcastle-upon-Tyne, UK

Professor Rugg-Gunn has been and remains an active investigator in the areas of dental caries and dental fluorosis. His scholarly contributions to these subjects are widely recognised and highly respected. He is a tireless contributor to his profession and the public, having served on the editorial boards of *Community Dental Health* and the *British Dental Journal* and as a consultant to or member of several government committees concerned with human health.

Professor Rugg-Gunn has also been a consistent advocate for ORCA, and ORCA is particularly grateful for his work in relation to the organisation of ORCA Summer Schools.
